Preface

The book entitled “*Agronomy Coach*” blends current information on agronomic principles and practices with a sense of fundamental perspective. It is an absolute conformity with the latest syllabus of the ICAR 6th Dean Committee and has been designed to cater to the requirements of both teachers and students. I have tried to awaken an interest in the subject by taking of the wonders of the theoretical and practical aspects of various agronomic topics. The aim has been to make the students aware of and sensitive to the fundamental principles and practices of agronomy. I have tried to accommodate frequently asked questions (FAQs) on different agronomic aspects asked in the interviews of various agricultural examinations. I have kept my writing style as clear and as straight forward as possible so that it will help the students to become interview-ready. I am in a great hope that this book will serve as a ready reckoner for the agronomy students for competitive examinations.

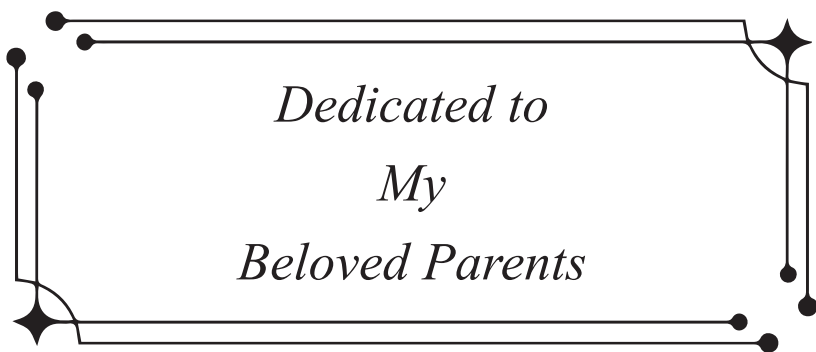

This book provides information only up to the publishing date. Efforts have been made to make this book as complete and accurate as possible. However, there may be errors in typography and content. Hence, any comments, shortcomings and suggestions to further improve this book would be gratefully received.

I wish to express my sincere gratitude to Renu Publishers, New Delhi. I thank all the persons involved in making this book a reality. This book would not have been possible without unstinting help from my family members, teachers and colleagues at all stages.
